

# HSSE POLICY

## GAC GLOBAL HUB SERVICES

At GAC Global Hub Services (GHS), we believe that health, safety, security and environment are fundamental elements in every interaction with our colleagues, shipping principals and customers, port agents, global network agents, third party service providers, visitors and our families.

At workplace and wherever we go, GAC's HSSE goals are simple: no harm to people, no security breaches and no damage to the environment.

Guided by OHSAS 18001:2007 and ISO 14001:2015 standards and in accordance with GAC Group's HSSE Management System (HSSE MS), GHS has established, documented and maintained its HSSE MS and is continually improving it to enhance its HSSE performance.

Our HSSE commitment includes, but is not limited to:

- Preventing injury and ill health in the workplace and wherever we operate
- Protecting the environment by conserving resources, proper disposal of waste and preventing air, land and water pollution
- Complying with all legal and other applicable requirements
- Fulfilling all compliance obligations
- Developing and reviewing HSSE objectives
- Getting HSSE right, the first time, every time

The GHS HSSE Policy is communicated, periodically reviewed and updated to guarantee its relevance and suitability to the organisation. This policy is available to all relevant interested parties through the company's intranet and website.
