

# GAC Marine - UAE

By your side, offshore

Full support for all your offshore activities in the Arabian Gulf and along the West Coast of India.

Delivering your strategy.

# Installing an offshore structure or building a quay wall?

You need a partner with the expertise and experience you can trust to give complex offshore development projects professional support. A partner like GAC Marine.

GAC Marine has been active in the Arabian Gulf, home to some of the world's most important reserves of oil and gas, for more than four decades.

Back in the 1970s, lightering of barges from the anchorage into what is now Mina Zayed Port was an important part of GAC Marine's business. Today, our tug and barge operations are a core element of our portfolio of integrated marine services.

#### The GAC Marine fleet

Our fleet includes modern tugs with up to 8,000 BHP and barges of up to 8,000 DWT. Tugs are well suited for a variety of tasks ranging from general towage and barge handling in support of dredging operations, to serving as monitoring or guard vessels.

Our barges that range in size from 150 to 280 feet are approved for ballasting, and have the deck strength required for heavy lift Ro-Ro operations. They may also be used to carry coated pipes, jackets, topsides and other materials for offshore construction.

#### Diversity meets flexibility

Our fleet has grown bigger and more sophisticated to serve the oil & gas sector, and we put our know-how at your disposal to ensure that every project – large or small – goes smoothly.

Our in-house capacity and fully equipped marine base gives us the flexibility to respond to customer demands for equipment modification to meet special requirements efficiently and cost-effectively way. This allows us to deliver short turn-around times for class surveys, modifications or repair / maintenance.

Our three in-house built Anchor Handling Tugs are used to support crane and pipe laying barges and for rig moves and Floating, Storage & Offloading (FSO) vessel support in the region. GAC Marine continues to play a vital role supporting the region's civil construction industry. We serve industries where the projects are rarely small-scale or short-term. And we have the resources, reliability and long vision to see them through to their successful conclusion.

Our diverse fleet of some 30 vessels includes anchor handling tugs, tow tugs, landing craft, crew transfer boats, and flat top cargo barges.

At GAC Marine Abu Dhabi we have earned a reputation for providing vessels that are built and maintained to the highest standards. A policy of preventive rather than corrective maintenance is key to providing charterers with trouble-free operation and minimum downtime.

Please visit [gac.com/marine](http://gac.com/marine) for a full fleet list.

#### The highest standards of quality, business ethics and safety

GAC Marine has an enviable track record of quality and compliance as a key player in some of the largest offshore development projects in the Middle East and India.

Everything we do is in line with the GAC Group's strict Compliance & Ethics policies and Code of Ethics, as well as anti-corruption regulations such as the US Foreign Corrupt Practices Act (FCPA) and the UK Bribery Act 2010.

Our commitment to Quality, Health, Safety, Security and Environment (HSSE) is reflected in the early adoption of a strong quality and safety

culture and our continuous efforts to meet the requirements of all relevant regulatory bodies and customers.

GAC Marine is certified in accordance with the ISM Code. It also has ISO 9001, ISO 14001, OHSAS 18001, ISPS Code and MLC certification.

## OUR PARTNERS

- Diving companies
- Dredging companies
- Heavy-lift contractors
- International survey companies
- Offshore construction companies
- Oil companies

## OFFSHORE SERVICES

- Anchor handling
- Barge transportation
- Crew changes and cargo supplies
- Guard / escort vessel services
- Offshore tanker berthing
- Pipe and offshore structure transportation

## Comprehensive range of marine services to the offshore industry

### About the GAC Group
